

Remember Right Said Fred and their wildly popular song "I'm Too Sexy"? They've been excellent on COVID and they just sent along this rather suspicious series of Tweets:

Meanwhile, the U.S., after praising Israel's vaccination work, is now discouraging travel there. Do exactly as they do...but it's too dangerous to travel there! Ha, got it!

At the same time, Sweden is going on two weeks of zero COVID deaths despite a mere 37% vaccination rate and the lowest mask compliance on the continent. Think maybe the situation is less cartoonish than the CDC would have us believe?
